

How to engineer your future

Design Drafter

- ▶ Great Company Benefits
- ▶ Located in Collingwood

Cardno Grogan Richards forms part of the Cardno Group. Cardno is an integrated professional services provider, delivering specialist advice to create or improve physical and social infrastructure that underpins communities around the globe. Our team is comprised of leading advisors who plan, design, manage and deliver sustainable projects and programs.

Cardno Grogan Richards is a leading multidisciplinary engineering consultancy that provides civil, structural, hydraulic, traffic and transportation services. As part of our talent management strategy we are seeking Design Drafters with various levels of experience within our Traffic team.

Based in a spacious and modern office in Collingwood, you will work closely with our senior drafters on a variety of projects. This is a fantastic opportunity to launch your career with an organisation that has strong foundations, a great reputation, a variety of projects and a chance to take advantage of the training, development and mentoring programs on offer.

To be successful in the role you will understand drafting principles, have experience with AutoCAD and some experience with MicroStation would be advantageous. In addition, you will have a keen desire to forge your career in the traffic drafting/engineering field.

In addition to an exciting Career opportunity Cardno will offer a competitive salary package for the right candidate. Cardno also offers the chance for eligible staff to share in the business' success through the staff share scheme as well as the opportunity to be part of a global organisation helping to shape the future.
